htmlacademy.ru - online - From January 2020 to March 2020

JavaScript: Base
htmlacademy.ru - online - From September 2019 to November 2019

MOTIVATION

I am fond of web development. I like to make user-friendly, beautiful and functional interfaces. I am currently looking for an internship or a job as a junior developer. I would like to work with React, because I consider its convenience for creating complex interfaces, cross-platform nature, and support by Facebook and the community to be a great advantage. I would like to study React, as well as related technologies, more deeply and gain practical experience.
